## WORK EXPERIENCE

Living Spring Web Developer Institute

November 2020-October 2022

I provided front-end website development using Wordpress.

I planned website development with HTML, CSS, JavaScript and JQuery languages.

I built an ecommerce website that keeps track of sales, income and also report to make sales personnel work easier.

I discussed site requirement with clients to produce actionable development plans.

I oversaw back-end development using PHP.

Obafemi Awolowo Teaching Hospital Complex

December 2019- October 2020

I programmed and designed an software that keep track of sales thereby making the store

personnel work easier

I helped end users to solve operating problems

I coached interns and new employees to boost department efficiency.

Built databases and table structures for web applications

I created logo, banners for the hospital.

Osun State College Of Technology, (OSSCOTECH)

January 2018 November 2019

I functioned as assistant lecturer in the department; lectures PHP as a course.

I presented a paper on Design and Implementation of a Hospital Management System to promote university reputation.

I prepared educational materials module writing on (database management system) and supportive handout.

I accessed, documented and reported on students progress for computer class.

I used PowerPoint and Google classroom to give presentations to students.
