With more than six years of experience creating scalable web and mobile applications, I am a results-driven software engineer. competent in front-end and back-end technologies, such as MySQL, PHP, JavaScript, and React.js. knowledgeable about connecting APIs, deploying apps to the cloud and experienced in building secure systems with Laravel. Strong team player with an emphasis on meeting deadlines while producing clear, quick, and user-centered solutions.

TECHNICAL SKILLS

Languages: JavaScript, PHP, HTML5, CSS3, SQL

Frontend: React.js, Bootstrap, jQuery

Backend: PHP (Laravel)

Mobile Development: Android (Java), React (Next.js)

Databases: MySQL, MariaDB

Tools: Git, VS Code, XAMPP

CMS & Design: WordPress, Figma

Other: API Integration, Responsive Design, Web Hosting

PROFESSIONAL EXPERIENCE

Full Stack Developer

Obafemi Awolowo University Teaching Hospitals Complex (OAUTHC)

Oct 2021 – Present

- Developed and maintained full-stack web applications using PHP, React.js, and MySQL for internal hospital operations
- Built a job application portal for recruitment processes
- Designed and implemented an intranet-based inventory management system
- Implemented authentication using custom PHP sessions and real-time updates via AJAX polling
- Resolved application issues and provided technical support to non-technical staff
- Designed scalable database systems for reporting, requisition, and inventory management
- Led UI modernization using reusable React components and responsive design

Web & Android Developer

Living Spring Web Developer Institute

Nov 2020 – Sep 2021

- Developed responsive, mobile-first websites and hybrid applications using HTML, CSS, JavaScript, PHP, and Android SDK
- Built an e-commerce platform with both web and Android versions integrated with MySQL
- Integrated third-party APIs including payment gateways
- Customized and managed WordPress-based systems
- Participated in code reviews and pair programming with junior developers

Assistant Lecturer – Multimedia Department

Osun State College of Technology (OSCOTECH)

Jan 2019 – Oct 2020

- Delivered lectures on multimedia and web development topics, including UI/UX design, web technologies, and digital media production
- Supervised practical sessions using tools such as Adobe Photoshop
- Guided students in developing multimedia and web-based projects
- Assessed student performance through assignments, tests, and practical evaluations
- Mentored students and provided academic and technical support
- Assisted in curriculum development and preparation of instructional materials

EDUCATION

Bachelor of Science in Computer Science
Adeleke University

2017

CERTIFICATIONS

- Adobe Dreamweaver CS6
- Supa base
- Google Android Developer

PROJECT HIGHLIGHTS

- Built using PHP, React, and MySQL, the hospital inventory management system allows for multi-user requests and reporting.
- Built using PHP and MySQL, job application portal allows for online application and Shortlisting process.
- PHP, MYSQL, and Android Studio were used to create the web and Android store for the multi-platform e-commerce application.
- Student Portal System: Using a Laravel backend, a portal for assignment submission and grading was designed.
- The Clinic Booking App is an Android-based appointment app that has notifications and Firebase authentication.
- Intern Application Portal for online intern application and shortlisting using Laravel, MYSQL
